Skills

- JavaScript
- React & React Native
- NextJS
- TailwindCSS
- Python
- PostgreSQL
- SQLAlchemy
- Psycopg2
- RestAPI
- FastAPI
- PyTorch
- TensorFlow
- Scikit-learn
- Numpy
- Pandas
- Neural Networks
- Git & Github
- Problem-solver
- Self-driven
- Curious
- Team Player

Emma Thonfors

Fullstack Developer | AI and Machine Learning Student

I'm a curious and motivated full-stack developer, currently studying AI and Machine Learning. My path started with frontend, but as I learned backend, I discovered how much I enjoy working across the full stack. Getting into AI and machine learning made everything click — developing solutions and building projects has become more than just a hobby or part of my studies; it's something I genuinely love doing.

What inspires me is that this field never stands still — there's always a new technology, a new challenge, and new knowledge to gain. I'm eager to gain hands-on experience, apply what I've learned, and tackle real-world challenges. My goal is to build meaningful solutions that make a difference and contribute to a company's success and innovation.

Education

2024 - 2026

Engineer AI and machinelearning
Teknikhögskolan

2022 - 2024

Frontend Development
Chas Academy

2013 - 2016

Humanities program
Norra Real

Experience

○ **May 2024 – August 2024**

Mentatt
Freelance - Web Development

I helped develop a website for a startup company by creating content and improving its design to make it more user-friendly and visually appealing. Additionally, I integrated i18next to translate the website into five languages, expanding its accessibility to a global audience. The company planned to launch an app at a later stage, so I built its structure in React Native using reusable components, making it easy for them to update the app with text and other content when needed.

○ **Nov 2023 - May 2024**

Linespotting
Internship - Frontend Development

Developed a website for a client, making it easier for them to work with Google Ads. My team and I were in charge of managing the entire website development process, from client communication and meeting the client's requirements to delivering the final project. We also learned backend development for this project.

○ **Jun 2016 - Present**

Ikea
Shop Assistant

Working as a bed specialist and wardrobe planner. As a bed specialist, I help customers choose the right mattress based on their needs and ergonomics. As a wardrobe planner, I assist customers in finding the best wardrobe or storage solution based on their measurements and preferences. Working for a large company like IKEA has truly challenged my previous sales experiences, as the customer demand is constantly high in the store. Therefore, I have learned to handle stress better and work more efficiently.
